

在/etc/sysctl.conf添加以下内容时:

```
net.bridge.bridge-nf-call-iptables = 1
net.bridge.bridge-nf-call-ip6tables = 1
```

```
[root@controller ~]# cat /etc/sysctl.conf
net.bridge.bridge-nf-call-iptables = 1
net.bridge.bridge-nf-call-ip6tables = 1
```

执行sysctl -p时出现如下报错:

```
[root@controller ~]# sysctl -p
sysctl: cannot stat /proc/sys/net/bridge/bridge-nf-call-ip6tables: No such file or directory
sysctl: cannot stat /proc/sys/net/bridge/bridge-nf-call-iptables: No such file or directory
```

解决方法:

```
[root@controller ~]# modprobe br_netfilter
[root@controller ~]# ls /proc/sys/net/bridge
bridge-nf-call-arptables  bridge-nf-filter-pppoe-tagged
bridge-nf-call-ip6tables  bridge-nf-filter-vlan-tagged
bridge-nf-call-iptables   bridge-nf-pass-vlan-input-dev

[root@controller ~]# sysctl -p
net.bridge.bridge-nf-call-iptables = 1
net.bridge.bridge-nf-call-ip6tables = 1
```
